NATIONAL FOUNDATION FOR
ECTODERMAL DYSPLASIAS

Ensuring Lasting Smiles Act (HR.1916, S.754)

Please cosponsor and support the bipartisan, bicameral *Ensuring Lasting Smiles Act (ELSA)*, which was reintroduced by Senate leads, Senator Tammy Baldwin (D-WI) and Senator Joni Ernst (R-IA), and House leads, Congresswoman Anna Eshoo (D-CA-18) and Congressman Drew Ferguson (R-GA-3), for the 117th Congress.

In the 117th Congress, this bill gained strong bipartisan support from over 40 U.S. Senate cosponsors, 317 U.S. House cosponsors and passed in the U.S. House of Representatives on April 4, 2022 with a vote of 310 – 110. ELSA is endorsed by a broad coalition of 70+ national health care professional and patient advocacy organizations.

Summary: This bipartisan legislation would require all private group and individual health plans to cover medically necessary items and services that are needed to repair congenital anomalies; stipulates that such coverage includes services and procedures that functionally repair or restore any missing or abnormal body part that is medically necessary to achieve normal body function or appearance; and clarifies the inclusion of adjunctive dental, orthodontic, or prosthodontic support.

Background: About four percent of children in the U.S. are born with congenital anomalies that affect the way they look, develop, or function. Many born with congenital anomalies suffer from severe oral defects (such as cleft lip or palate, hypodontia, enamel hypoplasia), skeletal defects (such as craniosynostosis), vision defects (such as congenital cataracts or aphakia), hearing defects (such as microtia), or other loss of bodily functions. Individuals who do not receive timely, continuous care for their congenital anomalies face long-term physical and psychological injuries.

Problem: Most group and individual health plans include coverages for congenital anomalies, and all 50 states require health insurers to provide coverage for the treatment of congenital anomalies. Despite this, health plans systematically and routinely deny or delay claims and appeals for treatment of congenital anomalies by wrongfully categorizing certain treatments or body parts as cosmetic or not medically necessary. This is a common practice that leaves families with the burden of paying 100% of the cost for their child's medically necessary treatments, despite maintaining private health plans.

Solution: *The Ensuring Lasting Smiles Act* will ensure that group and individual health plans do not deny or delay medically necessary treatments of congenital anomalies, therefore improving the health of countless Americans.

Contact Information: To cosponsor the S.754, please contact Sen. Baldwin's office and/or Sen. Ernst's office.
